

*Introducing AffirmX's*

# Internal Audit Outsourcing

Put AffirmX's outsourced, internal auditing services to work for your financial institution. Let us roll up our sleeves to help you.

- We leverage AffirmX's patented Risk Intel Center online platform, which enables us to work like a remote employee. Simply upload documents to our secure environment for off-site review. (Note: For clients where we have VPN connectivity, even uploading the documents is unnecessary.)
- We perform an independent and on-going third-party review of adherence to your financial institution's internal controls procedures in order to protect against fraud and ensure safe and sound internal operations.
- We'll work with you to ensure compliance with your applicable operational policies and procedures.
- We'll provide detailed reports on findings along with specific recommendations for addressing any noted deficiencies. We can also provide a year-end report, which is an invaluable tool at examination time.

## Internal Audit Outsourcing Delivered Remotely to Save You Money and Headaches

AffirmX draws upon the strengths of the architecture of its Risk Intel Center platform to deliver our services remotely and efficiently. That not only keeps costs down, it keeps us out of your hair.
